

Type FLS

A versatile flange clamp with a swivel unit for inclined applications. Supplied with a high tensile setscrew for a secure grip on both parallel and tapered flanges.

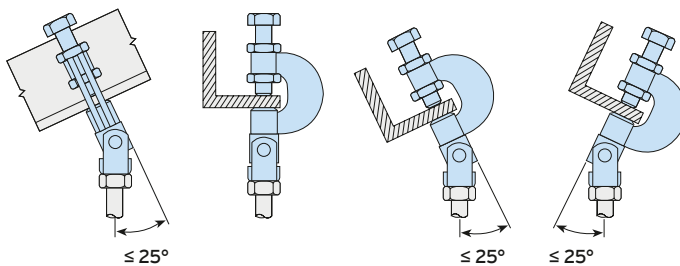

Material: High grade alloy steel, zinc plated.

Product Code	Rod Y	Safe Working Load (FOS 4:1)		Clamping Range W mm	Setscrew Z	Tightening Torque		Dimensions				
		Tensile ≤ 25°	Tensile 25° to 45°			Setscrew Z	Locknut N	R	T	U	X	Width
		kN	kN			Nm	Nm	mm	mm	mm	mm	mm
FLS08	M8	2.5	1.5	3 - 17	M10	18	18	55	53	58	27	28
FLS10	M10	2.5	1.5	3 - 17	M10	18	18	55	53	58	27	28

Independently Approved Applications

General Applications (Parallel Flanges only)

How to install...

- 1) Locate the FLS onto the flange.
 - 2) Ensuring the lug nut (M) locates into the main body, tighten down the setscrew (Z) and locknut (N).
 - 3) Install the threaded rod by screwing into the nut located in the nut basket (S). Ensure full thread capture.
 - 4) Secure assembly in nut basket (S) from beneath using a nut (not supplied).
- Ensure that the cup point setscrew always grips on the tapered side of the flange.
